Pearson LCCI Financial and Quantitative qualifications Level 1 to Level 4

LCCI qualifications have been offered internationally for over 100 years, and originally were developed by the London Chamber of Commerce and Industry (LCCI) to address the need for reliable, high quality standards across international workforces. That need is even more present today, and LCCI qualifications continue to meet it - providing internationally recognized standards in a range of professions to learners across the globe.

LCCI is a flexible qualifications programme with examinations at various levels, enabling learners to enter at the level that's most appropriate for them. Diplomas and Group Awards are also available to allow learners to add to their marketable skills and, in many cases, receive professional status

Widely regarded by employers for their practical focus on key business areas, LCCI qualifications are designed to give students flexibility, so that their learning can be balanced around existing commitments to achieve their goals. At UVA, we provide essential support to learners by offering LCCI qualifications as single subjects or in combination to create a unique diploma.

LCCI qualifications can offer students the opportunity to progress directly to university or other professional qualifications (such as ACCA, CIMA or ICEAW) and are often listed as essential requirements by international employers.

Diploma structure for the LCCI Financial and Quantitative qualifications - from January 2016

LCCI Diplomas qualifications are at Levels 2 to 4, and suitable for students who want to:

- specialise in a particular finance role, the Diplomas, will give LCCI students the technical skills required to perform in their chosen fields
- progress onto Higher Education or into Professional Body qualifications.
